Dear Youtube Team! I am writing to express my continuing dissatisfaction with your company service. I am disappointed because on your website location list I could not find Ukraine and in language list I wasn't able to find Ukrainian language. I registered on youtube website since and still waiting for this very important update not only for me, but for millions of Ukrainians users. Obviously, to resolve the problem, I would appreciate if you will add Ukraine and Ukrainian language into your website service. Could I please ask you to look into these matters not only on my behalf, but also on behalf of other attendees, and in fact, on behalf of your company, too. Best regards
